

## **ENUMERATION GUIDELINES**

Based on the 2005 Pikes Peak Regional Building Code, 2005 Edition, Section RBC312.6 Regulations for Commercial and Industrial Uses.

New commercial structures shall be addressed from the block series of the street that is located parallel to the exterior face of the structure which contains the front door.

Should no street parallel the front door, the assignment of the numeric address will be considered in the following order:

1. Access location(s) and number of access points  
  
    Separate access vs. common access  
  
    Full access vs. right in/right out only access  
  
    Access easement/shared driveways  
  
        -and-
2. Direction of the main entry
3. Structure location on the parcel
4. Number of buildings on the parcel
5. Recognizable geographic location
6. Lineal feet of street frontage
7. Requirement of private street or drive access name
