

Electrical Inspection Notice

Effective Monday, August 16, 2004

RESIDENTIAL MANUFACTURED/MOBILE HOMES

All residential manufactured/mobile homes set in parks within the city of Colorado Springs require approval from Pikes Peak Regional Building Department before electrical meters are set. This will occur after the electrical service inspection. A residential manufactured/mobile home that does not have the Colorado Division of Housing Insignia affixed within 30 days of this inspection will be subject to having the meter removed.

In addition, the electrical permit will not pass the final inspection until the state insignia is affixed and verified by RBD in a follow up inspection. This is effective Monday, August 16, 2004.

For more information, contact Terry Schneider, Electrical Field Inspection Supervisor, at 327-2913.
