

PIKES PEAK REGIONAL BUILDING DEPARTMENT

SCHEDULING INSPECTIONS

When you are ready for an inspection, call us at 719-327-2880. Have your permit number ready for the person who answers your call.

- Inspection requests received by 8:29 am will be scheduled for that day (M-F). Routes are then determined geographically, rather than by the time they were requested.
- Your sequence number should be available after 9:00. You may look up your permit number or address on our website: www.pprbd.org for that number or call our main phone line at 719-327-2880.
- You may request a phone call from your inspector prior to their arrival. They will call you approximately thirty minutes before they expect to be there. Our inspectors' cell phone numbers will show up as 'unknown' or blocked in an attempt to keep those numbers private.
- If you miss the call, your inspector will leave you a message with our main phone number. Our staff can communicate with the inspector via email to accommodate most situations.
