Subject: Summary Letter for Foundation Subgrade Construction Observations and
Materials Testing, the New Fountain Middle School, Fountain, Colorado

Project No. 16-2-148

Dear Mr. Stevens:

As requested by Mr. Mark Mullet of Art Klein Construction, this letter represents a summary of Kumar and Associates, Inc., construction observations and materials testing services during the foundation open-hole observations, subgrade preparations, and over excavation and fill replacement that have been performed during construction of the Phase 2 of the Fountain Middle School Project. Phase 2 incorporates the construction of the West portion of the proposed building, incorporating areas B-1, B-2, C and D. Our observations and testing services were performed during the months of September and October of 2016; and were performed on a part-time, as scheduled basis. Based on our observation and testing, it is our opinion that the items listed in this letter have been completed in substantial conformance with the project documents, and our project geotechnical engineering report dated March 18, 2016, project number 16-2-118. Details of our observations are documented on daily reports, which have been previously submitted.

If you should require any further information, please feel free to contact our office at your convenience.

Sincerely,

Kumar & Associates, Inc.
