ENGINEERING INSPECTION LETTER FOR 1435 RED HAVEN PL

Dear Mark McNab,

After reviewing the **1435 Red Haven PI** foundation layout, forms, and rebar, it is my conclusion that the foundation meets the requirements of the plans. The footings were inspected on June 19, 2025, the walls were inspected on July 8, 2025, and the piers were inspected on August 13, 2025. The concrete encased electrode or ufer ground has been installed in accordance with the guidelines of the local building authority. No modifications are required.

Sincerely,
Chris Morrison, P.E.
